

THE FULBRIGHT PROGRAM

The U.S. Government-funded Fulbright Program was established in 1946, soon after the World War II, under legislation introduced by former Senator J. William Fulbright. Designed to "increase mutual understanding between the people of the United States and the people of other countries..." The program has grown into one of the largest academic and cultural exchange programs in the world. The Fulbright Program offers grants to U.S. citizens and nationals of other countries for teaching, advanced research, graduate study and professional development. Since its inception, approximately 380,000 scholars have participated in the Fulbright Program. The Fulbright Program awards approximately 8,000 new grants annually.

USIEF - THE FULBRIGHT COMMISSION IN INDIA

The Indo-U.S. agreement on educational exchange, signed by Prime Minister Jawaharlal Nehru and U.S. Ambassador Loy Henderson on February 2, 1950 in New Delhi, established the United States Educational Foundation in India to administer the Fulbright Program in India. On July 4, 2008, the Government of India (GOI) and the U.S. Government (USG) signed a new agreement to strengthen educational exchanges between the two countries. The Foundation was renamed as United States-India Educational Foundation (USIEF) awarding Fulbright-Nehru scholarships and grants. USG and GOI are now equal partners for implementing Fulbright Program in India. A 10-member Board of Directors, five Americans living in India nominated by the U.S. Diplomatic Mission and five Indians nominated by the Government of India, governs USIEF.

Fulbright Experience

I attended an exclusive program at Stanford University which trains scholars interested in joining the legal academia. I benefitted from the diverse courses and personal guidance received from some of the leading legal luminaries through this program. I had the opportunity to engage in conversations with the Native American communities which helped me to compare their socio-legal issues with the indigenous groups in India.

– Kriti Sharma, 2017 Fulbright-Nehru Master's fellow at Stanford University, Stanford, CA

At the Fontana Corrosion Center, which is one of the world's leading research centers for corrosion, I analysed the deleterious effect of stress and corrosive environments on age-hardenable aluminum alloys which are critical for the aerospace industry. During the course of my stay, I travelled extensively throughout the United States and met people with whom I could exchange ideas on diverse topics.

– Ajaykrishnan Muralidharan, 2017 Fulbright-Nehru Doctoral Research fellow at Ohio State University, Columbus, OH

The grant allowed me to widen my scientific network in the United States. I did several presentations on the outcome from my research project on brain tumors and received valuable inputs from eminent scientists in the field of cancer biology. I attended the 2017 Society for Neuro Oncology Annual Meet in San Francisco, which is a prestigious conference in my field of specialization.

– Khushboo Irshad, 2017 Fulbright-Nehru Postdoctoral Research scholar at the University of Texas MD Anderson Cancer Center, Houston, TX

2020-2021 Fulbright-Nehru and other Fulbright Fellowships for Indian Citizens
